

# TITRATING WITH TYVASO DPI

## Helping patients reach their target maintenance dose with TYVASO DPI® (treprostinil)

How you titrate each patient may vary based on their tolerability. The TYVASO DPI Titration Kit helps you start patients on treatment and titrate them to their target maintenance dose. Each kit includes additional cartridges to allow for flexible titration, as well as 5 inhalers—1 inhaler per week for 4 weeks, plus 1 extra.<sup>1</sup>

### The TYVASO DPI Titration Kit includes:

- 16 mcg cartridges (quantity 112)
- 32 mcg cartridges (quantity 112)
- 48 mcg cartridges (quantity 28)

Your patient should titrate up through each cartridge strength in the Titration Kit, then transition to the Maintenance Kit that's appropriate for their target maintenance dose level.<sup>1</sup>

**ONCE PATIENTS REACH THEIR TARGET MAINTENANCE DOSE,** they will receive monthly refills of Maintenance Kits tailored to their dose. These Maintenance Kits are available with 4-week supplies of various dose strengths and 5 inhalers.

FOR MORE INFORMATION ABOUT THE TITRATION AND MAINTENANCE KITS AVAILABLE, VISIT [WWW.TYVASOHCPCOM.COM](http://WWW.TYVASOHCPCOM.COM).

# Steps for titrating TYVASO DPI<sup>1</sup>

## TYVASO DPI is titrated in 16 mcg increments<sup>1</sup>

- ✓ The starting dose is one 16 mcg cartridge (1 breath per cartridge, 4x daily)<sup>1</sup>
- ✓ Dosage should be increased by an additional 16 mcg per treatment session by moving up to the next cartridge strength, at approximately 1- to 2-week intervals, as tolerated<sup>1</sup>
- ✓ Titrate to a target maintenance dose of 48 mcg to 64 mcg per treatment session, 4x daily<sup>1\*</sup>

Taking a dose is as simple as:  
**JUST ONE BREATH—OPEN, LOAD, INHALE**

FOR MORE INFORMATION ABOUT DOSING AND TITRATION,  
INCLUDING HOW TO SWITCH, VISIT [WWW.TYVASOHCP.COM](http://WWW.TYVASOHCP.COM).

<sup>1</sup>If the prescribed dose is higher than 64 mcg per treatment session, more than 1 cartridge will be needed per session.<sup>1</sup>
